PROFESSIONAL SUMMARY

Frontend-focused Software Developer with a background in Computer Science and hands-on experience building interactive web applications using JavaScript, React, HTML, and CSS. Contributed to the development of a game-based web platform and recently developed modern UI applications using React.

Brings over 7 years of experience in IT support and project coordination, with strong skills in debugging, system performance, and cross-functional collaboration. Known for translating user and business requirements into functional, user-friendly solutions. Currently expanding expertise in modern frontend technologies, including TypeScript and scalable UI development.

TECHNICAL SKILLS

Programming & Frontend:

JavaScript, React, HTML, CSS, Python

Tools & Technologies:

Git, GitHub, Visual Studio Code, Jira, Zendesk

Cloud & Databases:

AWS (basic), MySQL

Concepts:

Component-based architecture, REST APIs (basic), debugging, responsive design, software testing fundamentals

EXPERIENCE

06/2019 - 04/2021

IT Support Analyst

National Assembly | Abuja, Nigeria

- Collaborated with software and infrastructure teams to troubleshoot and resolve system issues.
- Supported system performance monitoring and user experience improvements.
- Translated technical issues into clear communication for stakeholders.
- Contributed to improving application reliability and system stability

06/2012 - 06/2018

IT Technical Support Analyst

Fortune Games Limited | Abuja, Nigeria

- Delivered end-to-end support for software, hardware, and network systems.
- Supported MySQL databases and cloud-based infrastructure (AWS basics).
- Used Jira and Zendesk to track, prioritize, and resolve technical issues.
- Documented processes and contributed to system improvements

PROJECTS

Game-Based Web Application (Lottery Platform)

JavaScript, MySQL

- Contributed to the development of an interactive online lottery platform with real-time user interaction
- Built and supported dynamic frontend features using JavaScript
- Worked with backend data systems (MySQL) to manage user and transaction data
- Gained experience in performance, reliability, and user-facing system behavior

Church Website (Client Project)

HTML, CSS, JavaScript

- Designed and developed a responsive, client-facing website
- Collaborated with stakeholders to gather requirements and implement iterative feedback
- Built interactive UI elements using JavaScript and modern CSS techniques
- Currently refining and preparing the application for production deployment

References:
Available Upon Request.

Bank Account Management System
Python

- Developed a file-based application to manage customer accounts
- Implemented core banking operations such as deposits, withdrawals, and account creation
- Applied structured logic and data handling using file processing

Task Manager Application
React, JavaScript

- Developed a dynamic task management application using React
- Implemented component-based architecture and state management
- Designed a clean and responsive user interface for improved user experience
- Focused on reusable components and maintainable code structure

EDUCATION

BSc Computer Science
University of Nigeria (UNN), Enugu

Additional Studies:

- Tampere University – Information Technology (2024)
- Tampere University – Cyber Security Fundamentals (2024)
- Arffman Consulting – Finnish Language & Integration (2022)

LANGUAGES

English:

Proficient
